The worker honey bees collect nectars from the flowers, processed in their special stomach, called 'honey stomach' and deposit it in honeycomb by regurgitated processed nectar. In ancient times, the honey collectors used to collect honey from wild beehives attached to the rocks, trees or house corners. This practice is still continued today in most of the developing countries including India. The keeping of bees in hives and obtaining honey was started by a bishop in Hartz Mountain of Poland during 11th century. This probably was the first commercial production of honey. However, when Lorenzo Lorraine Langstroth,...
